Professional Profile

Data analyst experienced in the healthcare sector seeking to leverage my abilities in data to enhance patient outcomes, increase operational efficiency, and streamline regulatory compliance. Skilled in translating complex data into actionable insights for clinical, administrative, and executive stakeholders. With developed skills in SQL, Power BI, and Python I hope to advance my analytical skills and expertise in data visualization to contribute to the success of a progressive organization committed to delivering strategic value through data-driven decision-making and continuous improvement.

Work Experience

Southwest Network

November 2022-Present

Business Intelligence Analyst

- Led development and implementation of dozens of interactive dashboards through Power BI to all levels of staff for tracking key performance indicators such as productivity metrics, compliance measures, and day to day operations. This resulted in an improvement of 20% overall productivity, streamlined strategic planning and resource allocation, and almost full reduction in manual report generation. At the same time, vastly increasing transparency and eliminating manual tracking by end users.
- Responsible for centralizing and maintaining data sources, improving dashboards based on end user requests, and developing training processes on BI tools for staff to successfully use and interpret reports.
- Developed and maintained complex SQL queries and scripts to extract, clean, and analyze data from multiple databases, including EMR systems, claims data and financial data with intent to streamline operations and improve data accuracy.
- Collaborated with cross-functional teams to understand business requirements and translate them into analytical solutions.
- Managed ad hoc data requests from stakeholders across departments, delivering actionable insights within tight deadlines.

Leslie's Poolmart

April 2021-September 2022

Project Budget Coordinator

- Managed a \$32 million budget for Leslie's IT department, through tracking individual project spend by creating budgets and forecasts during the project's lifetime, ensuring accurate reporting of current situation along with total predicted outcome.
- Use predictive analysis based on historical data and statements-of-work to solidify the total expected cost of each project.
- Completely automate the creation of the weekly presentation using Microsoft VBA, saving a vast amount of time each week, also verifying the accuracy of the report given to the executives on a weekly basis.
- Collaborated with all IT executives to create a united budget tracking and reporting process that decreased the amount of time invoices were waiting to be approved and increased the accuracy of each project.

Core Competencies

- Proficient in SQL and Python for data extraction, manipulation, and analysis.
- Experienced with Power BI for creating interactive visualizations and dashboards.
- Strong analytical and problem-solving skills with keen attention to detail.
- Excellent communication and collaboration abilities, with a proven track record of working effectively in cross-functional teams.
- Familiarity with data warehousing concepts and ETL processes
